[PRP Annex 9 v.1 draft ak nss\(2\).docx](#)

Hi Heather and All,

I have made some revisions to the paragraph on the Climate Science report to add a bit more information on it and our path forward as Ash suggested. It needs review and agreement by the team and I will send to the report partners to ensure they are ok with the timing. Also, the paragraph should be reviewed again sometime in March to ensure we have the timing of the report's release right and to ensure everything else is on track.

Here's the revised paragraph from the chapter (also in the attached file):

"In 2015, Canada contracted supported the development of a bi-national report documenting current climate change science and knowledge gaps across the Great Lakes basin. The 2015 State of Climate Change Science in the Great Lakes Basin report will inform the Annex 9 Subcommittee and support some of the commitments under Annex 9. The report was released in November 2015 with a companion database that includes summaries of over 250 recent climate change studies. A binational Executive Summary of this report will be developed for posting on binational.net. In addition, a series of individual Annex-focussed webinars will be developed and hosted in the next cycle. It is anticipated that these webinars will lead to more fulsome discussions with the other Annexes on their understanding of climate change impacts and what their climate change information needs are. These discussions, along with a thorough review of the knowledge gaps identified in this report will also help the Annex 9 Subcommittee identify science and action priorities for the next cycle." [Here are Ash's comments: talk about discussions w/ co-leads/subcommittees/GLEC to do x, y, z; will report assist in setting up next round of priorities?; talk about sharing widely with other groups for info sharing; talk about database of records hosted on x].

There are a couple of other revisions elsewhere in the attached file, so please use this as the current version.

Also, Patrick sent out an email a week or so ago trying to get Canadian input for the domestic activities section without much success. We have resent it yesterday and have given folks until Nov 6 to send us a sentence or 2 on their work.

Cheers,

Nancy

Thanks Nancy. Send along your final edits when you have them. I should be able to turn this around fairly quickly. Look for something as final draft early next week.

Additionally, I believe we were going to check in on the 1st draft and need for a full sub-committee meeting in the near term. My notes reflect a preference for meeting on either 11/12 or 11/13. Would 9am CT on 11/12 work for folks? I'm going to pencil this in and await responses for attendance purposes.

Thanks all!

Heather

Hi All,

Please find some revisions and comments to the Annex 9 chapter for the PRP – I worked from Ash's clean version.

A couple of things to note –

1. I will revamp the paragraph on the Climate Change report – but that won't come until

tomorrow as I'm in an all day meeting today.

2. Patrick – we will need to get some of the Canadian experts to add their efforts to the domestic piece. I am not familiar with what has been done in the past 3 years but Wendy L, Frank S, Ram Y and others should be able to add some bullets here. We should also discuss with the province (MOECC and MNRF) to see what efforts they have done.

I agree with Ash that the domestic work could be summarized in table format to shorten this section.

Nancy

Here are some edits/comments/suggestions from me – I attached a clean and tracked version. Some of this is just formatting and consistency which we'll end up determining at the end.

Ash

Hi Folks!

Just a kind reminder about this request for input/review on your part. Please let me know if you have any questions.

Best,

Heather

HI Folks!

As promised, I'm forwarding a very rough draft of the Progress of the Parties template for Annex 9. Please take a look at this draft and send along your "tracked changes" for group review/consideration. You'll note that I've called out a few instances where I could use help (i.e., Canadian domestic actions taken and SOLEC status updates). I also recognize that we may need to revisit how this information is organized before we share it with our full A9 subcommittee.

For now, please review and edit to your liking. I'd love to have your feedback by COB, next Thursday (Oct 22).

Best,

Heather
